MR MEMORY

WORKING TOWARDS A SUSTAINABLE FUTURE

Mr Memory is tackling climate change as a team with an aim to being carbon neutral by 2025. Following the COP26 summit, we now know more than ever that it is our responsibility as a company to do more to help the planet. We are learning each day to reduce our carbon footprint and to help make the world a better place.

We are making changes in all areas of the business from procurement to recycling. Every small change that we make, we know is a step forward to being carbon neutral.

At Mr Memory we only use suppliers who use sustainable packaging and donate to environmental charity projects. We also purchase from the UK where possible to cut emissions and reduce freight shipments.

The philosophy we use as a company is **Reduce → Reuse → Recycle** as we believe that this is the best way forward to becoming green. First of all, we always aim to reduce our generation of waste. The next stage is to reuse anything we can, from water bottles to cardboard boxes, and for everything else we make sure we recycle as much as possible. Anything we are unable to recycle goes into our general waste which is then incinerated and turned into electricity.

- ✓ We encourage our employees to walk, cycle or car share
- ✓ We have waste reduction procedures in place - all of our packaging can be recycled
- ✓ Our printing is limited to essential customer paperwork only
- ✓ All of our suppliers use recyclable packaging, which we reuse where possible

- ✓ **Mailing bags** - use to store/waterproof valuable items (e.g documents)
- ✓ **Jiffy bags** - use to send old memory back for recycling, use for storage or posting other items
- ✓ **Anti-static bags** - use for storing small items (e.g screws, paper clips)
- ✓ **Paper invoice** - shred and use for packaging, animal bedding etc.

CAN BE RECYCLED

- ✓ Jiffy Bags - Cardboard boxes - Mailing Bags (LDPE) - Paper - Anti-static plastic packaging
Used RAM, HDDs/SSDs - See our [Free Recycling](#) page for more details

NOT CURRENTLY RECYCLED

- ✗ Anti-static bags - We are working on a 100% recyclable version so we can hit our 100% target!
