Working on Your Computer

Before Working Inside Your Computer

Use the following safety guidelines to help protect your computer from potential damage and to help to ensure your personal safety. Unless otherwise noted, each procedure included in this document assumes that the following conditions exist:

- You have performed the steps in Working on Your Computer.
- You have read the safety information that shipped with your computer.
- A component can be replaced or--if purchased separately--installed by performing the removal procedure in reverse order.

WARNING: Before working inside your computer, read the safety information that shipped with your computer. For additional safety best practices information, see the Regulatory Compliance Homepage at www.dell.com/regulatory_compliance.

CAUTION: Many repairs may only be done by a certified service technician. You should only perform troubleshooting and simple repairs as authorized in your product documentation, or as directed by the online or telephone service and support team. Damage due to servicing that is not authorized by Dell is not covered by your warranty. Read and follow the safety instructions that came with the product.

CAUTION: To avoid electrostatic discharge, ground yourself by using a wrist grounding strap or by periodically touching an unpainted metal surface, such as a connector on the back of the computer.

CAUTION: Handle components and cards with care. Do not touch the components or contacts on a card. Hold a card by its edges or by its metal mounting bracket. Hold a component such as a processor by its edges, not by its pins.

CAUTION: When you disconnect a cable, pull on its connector or on its pull-tab, not on the cable itself. Some cables have connectors with locking tabs; if you are disconnecting this type of cable, press in on the locking tabs before you disconnect the cable. As you pull connectors apart, keep them evenly aligned to avoid bending any connector pins. Also, before you connect a cable, ensure that both connectors are correctly oriented and aligned.

NOTE: The color of your computer and certain components may appear differently than shown in this document.

To avoid damaging your computer, perform the following steps before you begin working inside the computer.

1. Ensure that your work surface is flat and clean to prevent the computer cover from being scratched.
2. Turn off your computer (see Turning Off Your Computer).
3. If the computer is connected to a docking device (docked) such as the optional Media Base or Battery Slice, undock it.

   CAUTION: To disconnect a network cable, first unplug the cable from your computer and then unplug the cable from the network device.
4. Disconnect all network cables from the computer.
5. Disconnect your computer and all attached devices from their electrical outlets.

Downloaded from LpManual.com Manuals

6. Close the display and turn the computer upside-down on a flat work surface.

   NOTE: To avoid damaging the system board, you must remove the main battery before you service the computer.

7. Remove the main battery (see Battery).

8. Turn the computer top-side up.

9. Open the display.

10. Press the power button to ground the system board.

    CAUTION: To guard against electrical shock, always unplug your computer from the electrical outlet before opening the display.

    CAUTION: Before touching anything inside your computer, ground yourself by touching an unpainted metal surface, such as the metal at the back of the computer. While you work, periodically touch an unpainted metal surface to dissipate static electricity, which could harm internal components.

11. Remove any installed ExpressCards or Smart Cards from the appropriate slots.

Recommended Tools

The procedures in this document may require the following tools:

- Small flat-blade screwdriver
- #0 Phillips screwdriver
- #1 Phillips screwdriver
- Small plastic scribe
- Flash BIOS update program CD

Turning Off Your Computer

CAUTION: To avoid losing data, save and close all open files and exit all open programs before you turn off your computer.

1. Shut down the operating system:

   – In Windows Vista :

   Click **Start** , then click the arrow in the lower-right corner of the **Start** menu as shown below, and then click **Shut Down**.

   – In Windows XP:

   Click **Start** → **Turn Off Computer** → **Turn Off** . The computer turns off after the operating system shutdown process is complete.

2. Ensure that the computer and all attached devices are turned off. If your computer and attached devices did not automatically turn off when you shut down your operating system, press and hold the power button for about 4 seconds to turn them off.

Downloaded from LpManual.com Manuals

After Working Inside Your Computer

After you complete any replacement procedure, ensure you connect any external devices, cards, and cables before turning on your computer.

CAUTION: To avoid damage to the computer, use only the battery designed for this particular Dell computer. Do not use batteries designed for other Dell computers.

1. Connect any external devices, such as a port replicator, battery slice, or media base, and replace any cards, such as an ExpressCard.
2. Connect any telephone or network cables to your computer.

   CAUTION: To connect a network cable, first plug the cable into the network device and then plug it into the computer.
3. Replace the battery.
4. Connect your computer and all attached devices to their electrical outlets.
5. Turn on your computer.

Specifications

Technical Specifications

NOTE: Offerings may vary by region. The following specifications are only those required by law to ship with your computer. For more information regarding the configuration of your computer, click **Start → Help and Support** and select the option to view information about your computer.

System Information	
Chipset	
Latitude 5420/E5420/ 5520/E5520	Intel HM65 Express chipset
Latitude E5420m/E5520m	Intel GM45 Express chipset
DRAM bus width	64-bit
Flash EPROM	SPI 32 Mbits
PCIe Gen1 bus	100 MHz

Processor	
Types	
Latitude 5420/E5420/ 5520/E5520	Intel Core i3/i5/i7 series
Latitude E5420m/E5520m	Intel Core 2 series
	Intel Celeron (Socket P) series

Memory	
Memory connector	two SODIMM slots
Memory capacity	1 GB, 2 GB, 4 GB, or 8 GB
Memory type	
Latitude 5420/E5420/5520/E5520	DDR3 SDRAM, 1333 MHz
Latitude E5420m/E5520m	DDR3 SDRAM, 1066 MHz
Minimum memory	1 GB
Maximum memory	8 GB
	NOTE: Only 64-bit operating systems support more than 4 GB memory.

Downloaded from LpManual.com Manuals

Audio	
Type	two-channel high definition audio
Controller	92HD90B
Stereo Conversion	24-bit (analog-to-digital and digital-to-analog)
Interface:	
Internal	high definition audio
External	microphone-in connector, stereo headphones/external speakers connector
Speakers	1.5 W stereo
Internal speaker amplifier	1.5 W mono
Volume controls	media buttons for Media control

Video	
Type	Intel UMA video
Data bus	integrated video
Video controller	
Latitude 5420/E5420/5520/E5520	Intel HD Graphics
	Intel HD Graphics 3000
Latitude E5420m/E5520m	Intel GM45
Output	15-pin video connector
	19-pin HDMI connector

Communications	
Network adapter	10/100/1000 Mbps Ethernet LAN
Wireless	internal wireless local area network (WLAN), wireless wide area network (WWAN), and Bluetooth wireless support

Ports and Connectors	
Audio	microphone connector, stereo headphone/speakers connector
Video	15-pin VGA connector
Network adapter	RJ-45 connector
USB	three 4-pin USB 2.0-compliant connectors, one eSATA/USB 2.0-compliant connector
Memory card reader	5-in-1 memory card reader

Downloaded from LpManual.com Manuals

Display	
Type	White Light Emitting Diode (WLED) display
Size	
Latitude 5420/E5420/E5420m	14.0 inch high definition WLED
Latitude 5520/E55420/E5520m	15.6 inch high definition WLED
Active area (X/Y)	
Latitude 5420/E5420/E5420m	309.60 mm/173.90 mm
Latitude 5520/E55420/E5520m	344.20 mm/193.50 mm
Dimensions:	
Height	
Latitude 5420/E5420/E5420m	192.50 mm (7.57 inches)
Latitude 5520/E55420/E5520m	210.00 mm (8.27 inches)
Width	
Latitude 5420/E5420/E5420m	324.00 mm (12.75 inches)
Latitude 5520/E55420/E5520m	360.00 mm (14.17 inches)
Z-Height	
Latitude 5420/E5420/E5420m	5.20 mm (0.20 inch)
Latitude 5520/E55420/E5520m	5.80 mm (0.23 inch)
Diagonal	
Latitude 5420/E5420/E5420m	344.6 mm (14.00 inches)
Latitude 5520/E55420/E5520m	396.24 mm (15.60 inches)
Maximum resolution	
Latitude 5420/E5420/E5420m	
HD	1366 x 768 at 262 K colors
HD+	1600 x 900 at 262 K colors
Latitude 5520/E55420/E5520m	
HD	1366 x 768 at 263 K colors
FHD	1920 x 1080 at 262 K colors
Typical Brightness	200 nits
Operating angle	0° (closed) to 135°
Refresh rate	60 Hz
Minimum Viewing angles:	
Horizontal	+40°/–40°
Vertical	+10°/–30°

Downloaded from LpManual.com Manuals

Display	
Pixel pitch	
Latitude 5420/E5420/E5420m	
HD	0.2265 mm x 0.2265 mm
HD+	0.1935 mm x 0.1935 mm
Latitude 5520/E55420/E5520m	
HD	0.2520 mm x 0.2520 mm
FHD	0.1935 mm x 0.1935 mm

Keyboard	
Number of keys	United States: 86 keys, United Kingdom: 87 keys, Brazil: 87 keys, and Japan: 90 keys
Layout	QWERTY/AZERTY/Kanji

Touchpad	
Active Area	
X-axis	80.00 mm
Y-axis	40.70 mm

Battery	
Type	4-, 6- or 9-cell "smart" lithium ion
Dimensions:	
Height	
4-, 6-, and 9-cell	20.00 mm (0.79 inch)
Width	
4- and 6-cell	208.00 mm (8.18 inches)
9-cell	214.00 mm (8.43 inches)
Depth	
4- and 6-cell	48.08 mm (1.89 inches)
9-cell	71.79 mm (2.83 inches)
Weight	
4-cell	240.00 g (0.53 lb)
6-cell	344.73 g (0.76 lb)
9-cell	508.20 g (1.12 lb)
Voltage	

Downloaded from LpManual.com Manuals

Battery		
4-cell	14.8 VDC	
6- and 9-cell	11.1 VDC	
Temperature range:		
Operating	0 °C to 50 °C (32 °F to 122 °F)	
Non-Operating	–40 °C to 85 °C (–40 °F to 185 °F)	
	NOTE: The battery pack is capable of safely withstanding the above storage temperatures with 100% charge.	
	NOTE: The battery pack is also capable of withstanding storage temperatures from –20 °C to +60 °C with no degradation in its performance.	
Coin-cell battery	3 V CR2032 lithium coin cell	

AC Adapter		
Input voltage	100 VAC to 240 VAC	
Input current (maximum)	1.5 A, 1.6 A, or 1.7 A	
Input frequency	50 Hz to 60 Hz	
Output power	65 W or 90 W	
Output current	65 W	90 W
	3.34 A (continuous)	4.62 A (continuous)
Rated output voltage	19.5 +/– 1.0 VDC	
Dimensions		
	65 W	90 W
Height	16.00 mm (0.63 inch)	16.00 mm (0.63 inch)
Width	66.00 mm (2.60 inches)	70.00 mm (2.76 inches)
Length	127.00 mm (5.00 inches)	147.00 mm (5.79 inches)
Temperature range:		
Operating	0 °C to 40 °C (32 °F to 104 °F)	
Non-Operating	–40 °C to 70 °C (–40 °F to 158 °F)	

Physical	
Height	
Latitude 5420/E5420/E5420m	29.90 mm to 32.50 mm (1.18 inches to 1.28 inches)
Latitude 5520/E5520/E5520m	30.20 mm to 33.20 mm (1.19 inches to 1.31 inches)
Width

System Setup

Overview

System Setup allows you to:

- change the system configuration information after you add, change, or remove any hardware in your computer.
- set or change a user-selectable option such as the user password.
- read the current amount of memory or set the type of hard drive installed.

CAUTION: Unless you are an expert computer user, do not change the settings for this program. Certain changes can cause your computer to work incorrectly.

Entering System Setup

1. Turn on (or restart) your computer.
2. When the blue DELL logo is displayed, you must watch for the F2 prompt to appear.
3. Once the F2 prompt appears, press <F2> immediately.

   NOTE: The F2 prompt indicates that the keyboard has initialized. This prompt can appear very quickly, so you must watch for it to display, and then press <F2> . If you press <F2> before you are prompted, this keystroke will be lost.
4. If you wait too long and the operating system logo appears, continue to wait until you see the Microsoft Windows desktop. Then, shut down your computer and try again.

System Setup Options

NOTE: Depending on the computer and its installed devices, the items listed in this section may or may not appear.

General	
System Information	This section lists the primary hardware features of your computer. • System Information • Memory Information • Processor Information • Device Information
Battery Information	Displays the battery status and the type of AC adapter connected to the computer
Boot Sequence	Allows you to change the order in which the computer attempts to find an operating system. • Diskette Drive • Internal HDD

Downloaded from LpManual.com Manuals

General	
	• USB Storage Device • CD/DVD/CD-RW Drive • Onboard NIC • Cardbus NIC
Boot List Option	Allows you to change the boot list option. • Legacy • UEFI
Date/Time	Allows you to change the date and time.
System Configuration	
Integrated NIC	Allows you to configure the integrated network controller. The options are: • Disabled • Enabled • Enabled w/PXE • Enabled w/ImageServer Default Setting: **Enabled w/PXE**
System Management	Allows you to control the systems management mechanism. The options are: • Disabled • Alert Only • ASF 2.0 • DASH/ASF 2.0 Default Setting: **Disabled**
Serial Port	Identifies and defines the serial port settings. You can set the serial port to: • Disabled • Auto • COM1 • COM2 • COM3 • COM4 **NOTE:** The operating system may allocate resources even though the setting is disabled.
Parallel Port	Allows you to configure the parallel port on the docking station. The options are: • Disabled • AT • PS2 • ECP • DMA1 • DMA3

Downloaded from LpManual.com Manuals

System Configuration	
	Default Setting: **AT**
Serial Port	Allows you to configure the integrated serial port. The options are: • Disabled • COM1 • COM2 • COM3 • COM4 Default Setting: **COM1**
SATA Operation	Allows you to configure the internal SATA hard-drive controller. The options are: • Disabled • ATA • AHCI Default Setting: **AHCI** **NOTE:** SATA is configured to support RAID mode.
USB Controller	Allows you to control the USB controller. The options are: • Enable USB Controller • Diasabe USB Mass Storage Dev • Disable USB Controller Default Setting: **Enable USB Controller**
SMART Reporting	Allows you to activate the Self Monitoring Analysis and Reporting Technology (SMART). Default Setting: **Disabled**
Diskette Drive	Allows you to activate the diskette drives. The options are: • Disabled • Enabled Default Setting: **Disabled**
Miscellaneous Devices	Allows you to enable or disable the following devices: • Internal Modem • Fixed Bay • eSATA Ports • Hard Drive Free Fall Protection • External USB Port • Microphone • Camera You can also enable or disable Media Card and 1394 together. Default Setting: All devices are enabled.
Keyboard illumination	Allows you to configure the keyboard illumination feature. The options are:

Downloaded from LpManual.com Manuals

System Configuration	
	• Disabled • Level is 25% • Level is 50% • Level is 50% • Levels is 100% Default Setting: **Level is 75%**
Drives	Allows you to configure the SATA drives on board. The options are: • SATA-0 • SATA-1 • SATA-4 • SATA-5 Default Setting: All drives are enabled.

Video	
LCD Brightness	Allows you to set the display brightness depending up on the power source (On Battery and On AC).

NOTE: The Video setting will only be visible when a video card is installed into the system.

Security	
Admin Password	Allows you to set, change, or delete the administrator (admin) password. **NOTE:** You must set the admin password before you set the system or hard drive password. **NOTE:** Successful password changes take effect immediately. **NOTE:** Deleting the admin password automatically deletes the system password and the hard drive password. **NOTE:** Successful password changes take effect immediately. Default Setting: **Not set**
System Password	Allows you to set, change or delete the system password. **NOTE:** Successful password changes take effect immediately. Default Setting: **Not set**
Internal HDD-0 Password	Allows you to set or change the system's internal hard-disk drive. **NOTE:** Successful password changes take effect immediately. Default Setting: **Not set**
Password Bypass	Allows you to enable or disable the permission to bypass the System and the Internal HDD password, when they are set. The options are: • Disabled • Reboot bypass

Downloaded from LpManual.com Manuals

Security	
	Default Setting: **Disabled**
Password Change	Allows you to enable the disable permission to the System and Hard Drive passwords when the admin password is set. Default Setting: **Allow Non-Admin Password Changes** is not selected
Strong Password	Allows you to enforce the option to always set strong passwords. Default Setting: **Enable Stron Password** is not selected.
OROM Keyboard Access	Allows you to set an option to enter the Option ROM Configuration screens using hotkeys during boot. The options are: • Enable • One Time Enable • Disable Default Setting: **Enable**
TPM Security	Allows you to enable the Trusted Platform Module (TPM) during POST. Default Setting: The option is disabled.
Computrace	Allows you to activate or disable the optional Computrace software The options are: • Deactivate • Disable • Activate **NOTE:** The Activate and Disable options will permanently activate or disable the feature and no further changes will be allowed Default Setting: **Deactivate**
CPU XD Support	Allows you to enable the Execute Disable mode of the processor. Default Setting: **Enable CPU XD Support**
Non-Admin Setup Changes	Allows you to determine whether changes to the setup options are allowed when an Administrator Password is set. If disabled the setup options are locked by the admin password.
Password Configuration	Allows you to determine the minimum and maximum length of Administrator and System passwords.
Admin Setup Lockout	Allows you to prevent users from entering Setup when an Administrator password is set. Default Setting: **Enable Admin Setup Lockout** is not selected.

Performance	
Multi Core Support	This field specifies whether the process will have one or all cores enabled. The performance of some applications will improve with the additional cores. This option is enabled by default.Allows you to enable or disable multi-core support for the processor. The options are: • All • 1

Downloaded from LpManual.com Manuals

Performance	
	• 2 Default Setting: **All**
Intel® SpeedStep™	Allows you to enable or disable the Intel SpeedStep feature. Default Setting: **Enable Intel SpeedStep**
C States Control	Allows you to enable or disable the additional processor sleep states. Default Setting: The options **C states**, **C3**, **C6**, **Enhanced C-states**, and **C7** options are enabled.
Limit CPUID	Allows you to limit the maximum value the processor Standard CPUID Function will support. Default Setting: **Enable CPUID**
Intel® TurboBoost™	Allows you to enable or disable the Intel TurboBoost mode of the processor. Default Setting: **Enable Intel TurboBoost**
Hyper-Thread Control	Allows you to enable or disable the HyperThreading in the processor. Default Setting: **Enabled**

Power Management	
AC Behavior	Allows you to enable or disable the computer from turning on automatically when an AC adapter is connected. Default Setting: **Wake on AC** is not selected.
Auto On Time	Allows you to set the time at which the computer must turn on automatically. The options are: • Disabled • Every Day • Weekdays Default Setting: **Disabled**
USB Wake Support	Allows you to enable USB devices to wake the system from Standby. **NOTE:** This feature is only functional when the AC power adapter is connected. If the AC power adapter is removed during Standby, the system setup will remove power from all of the USB ports to conserve battery power.
Wireless Radio Control	Allows you to enable or disable the feature that automatically switches from wired or wireless networks without depending on the physical connection. Default Setting: **Disabled**
Wake on LAN	Allows you to enable or disable the feature that powers on the computer from the Off state when triggered by a LAN signal. Default Setting: **Disabled**
ExpressCharge	Allows you to enable or disable the ExpressCharge feature. The options are: • Standard • ExpressCharge Default Setting: **Standard**

Downloaded from LpManual.com Manuals

Power Management	
Charger Behavior	Allows you to enable or disable the battery charger. The options are; • Disabled • Enabled Default Setting: **Enabled**
POST Behavior	
Adapter Warnings	Allows you to enable or disable the system setup (BIOS) warning messages when you use certain power adapters. Default Setting: **Enable Adapter Warnings**
Mouse/Touchpad	Allows you to define how the system handles mouse and touch pad input. The options are: • Serial Mouse • PS2 Mouse • Toushpad/PS-2 Mouse Default Setting: **Touchpad/Mouse 2**
Numlock Enable	Allows you to enable the Numlock option when the computer boots. Default Setting: **Enable Network**
USB Emulation	Allows you to enable or disable the Legacy USB Emulation. Default Setting: **Enable Legacy USB Emulation** is selected.
Fn Key Emulation	Allows you to set the option where the <Scroll Lock> key is used to simulate the <Fn> key feature. Default Setting: **Enable Fn Key Emulation**
POST HotKeys	Allows you enable the sign-on screen message display indicating the keystroke sequence to access the System Setup option menu. Default Setting: **Enable F12 Boot Option Menu**
Fastboot	Allows to set the option to speed up the boot process. The options are: • Minimal • Thorough • Auto Default Setting: **Thorough**
Virtualization Support	
Virtualization	Allows you to enable or disable the Intel Virtualization Technology. Default Setting: **Enable Intel Virtualization Technology**
Wireless	
Wireless Switch	Allows to set the wireless devices that can be controlled by the wireless switch. The options are: • WWAN

Downloaded from LpManual.com Manuals

Wireless	
	• WLAB • Bluetooth Default Setting: All the options are selected.
Wireless Device Enable	Allows you to enable or disable the wireless devices.

Maintenance	
Service Tag	Displays the Service Tag of your computer.
Asset Tag	Allows you to create a system asset tag if an asset tag is not already set. This option is not set by default.
SERR Messages	Controls the SERR message mechanism. This option is not set by default. Some graphics cards require that the SERR message mechanism be disabled.

System Logs	
BIOS Events	Allows you to view and clear the System Setup (BIOS) POST events.
DellDiag Events	Allows you to view and clear the DellDiag events.
Thermal Events	Allows you to view and clear the Thermal events.
Power Events	Allows you to view and clear the Power events.
BIOS Progress Events	Allows you to view and clear the BIOS Progress Events.

Diagnostics

Diagnostics

Device Status Lights

	Turns on when you turn on the computer and blinks when the computer is in a power management mode.
	Turns on when the computer reads or writes data.
	Turns on steadily or blinks to indicate battery charge status.
	Turns on when wireless networking is enabled.
	Turns on when a card with Bluetooth wireless technology is enabled. To turn off only the Bluetooth wireless technology function, right-click the icon in the system tray and select **Disable Bluetooth Radio**

Battery Status Lights

If the computer is connected to an electrical outlet, the battery light operates as follows:

Alternately blinking amber light and blue light	An unauthenticated or unsupported non-Dell AC adapter is attached to your laptop.
Alternately blinking amber light with steady blue light	Temporary battery failure with AC adapter present.
Constantly blinking amber light	Fatal battery failure with AC adapter present.
Light off	Battery in full charge mode with AC adapter present.
Solid white light on	Battery in charge mode with AC adapter present.

Battery Charge and Health

To check the battery charge, press and release the status button on the battery charge gauge to illuminate the charge-level lights. Each light represents approximately 20 percent of the total battery charge. For example, if four lights are on, the battery has 80 percent of its charge remaining. If no lights appear, the battery has no charge.

To check battery health using the charge gauge, press and hold the status button on the battery charge gauge for at least 3 seconds. If no lights appear, the battery is in good condition and more than 80 percent of its original charge

Downloaded from LpManual.com Manuals

capacity remains. Each light represents incremental degradation. If five lights appear, less than 60 percent of the charge capacity remains, and you should consider replacing the battery.

Keyboard Status Lights

The lights located above the keyboard indicate the following:

Turns on when the numeric keypad is enabled.

Turns on when the Caps Lock function is enabled.

Turns on when the Scroll Lock function is enabled.

Contacting Dell

Contacting Dell

NOTE: If you do not have an active Internet connection, you can find contact information on your purchase invoice, packing slip, bill, or Dell product catalog.

Dell provides several online and telephone-based support and service options. Availability varies by country and product, and some services may not be available in your area. To contact Dell for sales, technical support, or customer service issues:

1. Visit **support.dell.com**.
2. Select your support category.
3. If you are not a U.S. customer, select your country code at the bottom of the page, or select **All** to see more choices.
4. Select the appropriate service or support link based on your need.
